# Overview

A regional health network’s patient portal is confusing, inaccessible, and ignored. This is the story of redesigning it with patients, nurses, and a WCAG checklist at the table.

|                 |                     |                     |
|-----------------|---------------------|---------------------|
| 3×              | AA                  | -52%                |
| Portal adoption | WCAG 2.2 compliance | Missed appointments |

|             |                                            |

CONTENTS

Season 1 — Discovery

|                          |        |
|--------------------------|--------|
| S1:E1 The Brief          | 6 min  |
| S1:E2 Into the Field     | 4 min  |
| S1:E3 The Synthesis Wall | 11 min |

Season 2 — Design & Delivery

|                                 |       |
|---------------------------------|-------|
| S2:E1 Rough Cuts                | 9 min |
| S2:E2 The System                | 7 min |
| S2:E3 Launch Day                | 5 min |
| S2:E4 Epilogue: What We Learned | 3 min |

## SEASON 1

# Discovery

S1:E1 · 6 min read

## The Brief

*Stakeholders arrive with a problem statement, a deadline, and three conflicting definitions of success.*

IMAGE SLOT · 16:9

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

---

S1:E2 · 4 min read

## Into the Field

*Twenty-four interviews, two diary studies, and one very honest usability session change the direction of the project.*

IMAGE SLOT · 16:9

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

*“Placeholder pull quote from a stakeholder, customer, or teammate about the impact of this work.”*

— Name, Title at Harborview Health

S1:E3 · 11 min read

## The Synthesis Wall

*Hundreds of sticky notes collapse into five insights and a single job-to-be-done the whole team can rally behind.*

**IMAGE SLOT · 16:9**

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

## SEASON 2

# Design & Delivery

S2:E1 · 9 min read

## Rough Cuts

*Low-fidelity flows are tested, torn apart, and rebuilt in a week of rapid prototyping.*

IMAGE SLOT · 16:9

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

---

S2:E2 · 7 min read

## The System

*Components, tokens, and interaction patterns are formalized so engineering can ship with confidence.*

IMAGE SLOT · 16:9

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

*“Placeholder pull quote from a stakeholder, customer, or teammate about the impact of this work.”*

— Name, Title at Harborview Health

---

S2:E3 · 5 min read

## Launch Day

*The release goes live. Dashboards light up, support tickets drop, and the team finally sleeps.*

IMAGE SLOT · 16:9

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.

---

S2:E4 · 3 min read

## Epilogue: What We Learned

*A candid retrospective on what worked, what did not, and what comes next.*

**IMAGE SLOT · 16:9**

Placeholder — project artifact, screen, or process photo.

Placeholder narrative: describe the situation, the constraints, and what was at stake. Keep it human — who was affected, and why did it matter to the business?

Placeholder narrative: walk through the decisions made in this phase, the alternatives considered, and the evidence that tipped the balance. Show the messy middle, not just the polished result.
